**Profile Summary:**

ALTIOS' services include: market entry & expansion, business development, market assessments & qualification, investment strategy, business development consultants, accounting experts, corporate finance specialists, tax & HR professionals to offer in-market every stage of their external development. ALTIOS brings together 200 employees from 18 different markets worldwide including:

- Providing industry-leading engineering expertise
- Leveraging extensive experience in a multitude of technologies
- Ongoing commitment to our clients and their evolving needs
- Providing a professional outsourcing experience

**Advanced Composite Structures Australia Pty Ltd**

Profile Summary:

Advanced Composite Structures Australia (ACS Australia) is a world leader in composites technology development and implementation; delivering innovative light-weight designs, advanced manufacture of components and assemblies and through-life support of application-critical composite structures.

ACS Australia is focused on delivering competitive advantage for our clients using novel, cost-effective and practical solutions. This is achieved via provision of precision engineering and manufacturing services, including:

- Light-weight composites design, analysis and optimisation
- Innovative materials and manufacturing technologies
- Globally recognised expertise in inspection and maintenance of composites
- A portfolio of innovative products and patented processes that are available for commercialisation and technology transfer.

ACS Australia has the expertise and experience to conduct and manage any project from start to finish; and commits to the provision of on-going, value-adding technology development, applied engineering services, and niche low-volume advanced manufacturing, with long-term engagement being the driving principle.

**Aerium**

Profile Summary:

Aerium consists of a team of experienced consultants from a diverse range of industries including automotive, food, engineering, Government, Industrial and Power to name a few having occupied roles including CEO and CFO of major listed companies, Engineering Management, SME owners and Lean and Agile practitioners and Trainers.

Services provided include:

- Strategic Planning
- Financial Reviews and Profit Improvement Plans
- Sales and Marketing Plans
- Export Development Plans
- Manufacturing reviews
- Costing Reviews
- Delivery (FOT) improvement plans
- Lean and Agile Training
- Workshops & Training
- HR reviews
- Innovation Commercialisation

**ALS Industrial Pty Ltd**

Profile Summary:

ALS offers a suite of testing, inspection and engineering services assisting clients to maximise production, extend asset life, ensure reliable plant operation and achieve compliance.

Since 1957 we have been providing condition monitoring, inspection and engineering services across Australia. We currently maintain over 600 staff nationally across 12 branch locations (and many site based engagements) providing services to the Power, Mining, Oil and Gas and Water Industries nationally. Our services include:

- Condition Monitoring – including vibration analysis, lubricant analysis, thermography, machine balancing, and laser alignment
- Non-Destructive Testing – including all traditional (radiography, magnetic particle testing, dye penetrant testing, ultrasounds, Eddy Current Testing) and advanced methods (including Phased Array Ultrasounds (PAUT), Long range ultrasounds (LRUT), Saturate Low Frequency Eddy Current (SLOFEC), Computed and Digital Radiography
- Vessel Inspection
- Tank Inspection
- Materials Engineering Testing and Consultancy
- Civil and Concrete Testing and Consultancy
- Mechanical Testing
- Reliability and Integrity Engineering

**Altair Engineering Software Pty Ltd**

Profile Summary:

Altair is a global multi-disciplinary engineering software and consulting service provider, specialising in the simulation and design of components, systems, vehicles and infrastructure by modelling the structural, fluid, thermal and electromagnetic behaviours which govern their performance.

Altair is a major supplier to defence and industry in all engineering verticals, from medical and marine to automotive and aerospace.

For more information, please go to www.altairengineering.com.au.

**ALTIOS International**

Profile Summary:

ALTIOS is an accelerator for international growth. We provide international expansion and cross-border investment services for SMEs at every stage of their external development. ALTIOS brings together 200 employees from 18 different markets worldwide including: business development consultants, accounting experts, corporate finance specialists, tax & HR professionals to offer in-market structural support to businesses looking to expand and consolidate their overseas activities.

ALTIOS’ services include: market entry & expansion, business development, market assessments & qualification, investment strategy, cross-border acquisition, greenfield & brownfield investments.
Since 1992, ACIG has worked with hundreds of companies throughout the private, not-for-profit, and government sectors. Small enough to listen but large enough to deliver, ACIG provides the skills and tools necessary for your organization to take the next steps with confidence.

ACIG will work with your team to deliver training and/or implementation of:

- Continuous Improvement
- Change Management
- Process Mapping and Review
- Systems Thinking
- Governance and Strategy Overhaul

Our services include: engineering design and analysis (hydrodynamics, naval architecture), structural engineering, installation engineering and support (analysis, procedures, equipment specification, on-site management), risk and safety engineering (Risk Assessments, Safety Cases, Software Assurance, SIS assessments, cert models, audits, training), complex numerical modelling and analysis (including Computational Fluid Dynamics (CFD) and Finite Element Analysis (FEA), and physical model testing and validation.

Familiar with innovation and R&D processes, from concept to product commercialization and through all Technology Readiness Levels (TRLs), we can operate within specified domestic and international standards, and provide third party verification, benchmarking, and certification services to advance processes, improve products, and realize commercial potential.

ANZA Technology Network

ANZA Technology Network is the leader in launching Australian technology companies in the U.S. market. Our business accelerator services are world-class, customized, and targeted to each entrepreneur’s unique needs to build a sustainable, high-growth business in the U.S. Our talented network of market experts are matched with you at each phase of your journey and work with you to develop strategic partnerships, get new customers and raise capital.

Arthur Street Digital

Arthur Street Digital is a boutique digital marketing agency based in Melbourne and Geelong. Our clients range from national corporations such as News Corp to local small businesses and span all market sectors, including manufacturing. Our services include: Marketing Strategy; Brand Strategy; Digital Marketing Training; Website Development; SEO and SEM (AdWords); Social Media; Content Development; Pay Per Click Campaigns; Marketing Automation; Lead Nurturing.

Arrayware Pty Ltd

Arrayware develops hyper-fast, custom-engineered hardware for complex analysis, diagnosis, extreme image processing, time intensive modelling, advanced control, big data solutions, wired and wireless data transport. Its customer base has grown over twenty years to include: life science; mining; chemistry; medical; communications; physics; automotive; agriculture and finance. The results are 100’s of times speed-up and significant power and space reductions over conventional hardware.

Why our solution is different

Arrayware applies FPGA technology to accelerate digital computation in diverse domains. Unlike other computation technologies, FPGAs can drastically accelerate computation even when the problem cannot be solved using parallel computing methods. When algorithms need a high amount of data passing between iterative solution steps, FPGAs do not suffer from high performance roll-off.

Regardless of the problem type, FPGA technology uses less power and has less latency than fetch and execute machines such as microprocessors, DSPs, and GPUs.

Australian Continuous Improvement Group (ACIG)

ACIG delivers capacity building and implementation services which directly fit within DEDJTR’s Service Activities of Process Innovation, Business Process and System Improvements; and Business Transformation.

ACIG will work with your team to deliver training and/or implementation of:

- Continuous Improvement
- Change Management
- Process Mapping and Review
- Systems Thinking
- Governance and Strategy Overhaul

Since 1992, ACIG has worked with hundreds of companies throughout the private, not-for-profit, and government sectors. Small enough to listen but large enough to deliver, ACIG provides the skills and tools necessary for your organization to take the next steps with confidence.
Avant Group

Profile Summary:
Avant Group offers technical engineering research support combined with marketing and commercialisation guidance and advisory services. The business specialises in technical consultancy and innovation, research and development project management and new market entry and facilitation services.

Avant Group is a team of specialised Business Advisory, Marketing Strategy and Government Grant consultants with representatives across Victoria, South Australia and New South Wales. The Avant Group team works with an array of different businesses from varying Industry Sectors to identify growth and commercialisation opportunities for its clients.

The business employs a team of engineers to assist companies in R&D project management activities. In addition, the company has a suite of services including marketing and strategic advisory, and trade assistance.

The business is a unique offering in Australia in that it is the only independent firm with multi faceted support services and a strong focus on technical innovation partnerships with clients.

Bayly Group Pty Ltd

Profile Summary:
We know you have some problems, can we help?
- Design Strategy for your business
- New Product Development
- Innovation in food and enhanced packaging
- Grow your business organically

We understand what family business is all about. Bayly is and has been a family business since 1971.

We work to ensure that your family business creates a legacy that you and your family can be proud of for generations to come.

For over 25 years the Bevington Group has been providing specialist productivity improvement services in a wide range of government services and commercial sectors, including: aviation; consumer affairs; defence; education; health; human services; local government; transport and border security; trade and treasury and finance.

Our services include:
- Lean and Agile Practice supports rapid non value add (Noise or Waste) removal from processes
- Process Re-engineering Practice provides quantified process and roles data that supports FTE reduction or role redesign
- Operating Model Practice enables the organisation to reconfigure itself to deliver on its products or services. Often a top down (strategic – future view) and bottom up (current view) analysis is required
- Change Management Practice supports the delivery of change that ensures the role, process and system are considered holistically

Bayly Group Pty Ltd

Profile Summary:
We know you have some problems, can we help?
- Design Strategy for your business
- New Product Development
- Innovation in food and enhanced packaging
- Grow your business organically

We understand what family business is all about. Bayly is and has been a family business since 1971.

We work to ensure that your family business creates a legacy that you and your family can be proud of for generations to come.

We have a knack for creating great industrial B2B products for our customers and typically serve them for many years.

By helping our customers discover the most valuable, important and unfulfilled needs of their customers, we design products that provide organic growth. This approach is cost effective and guarantees maximum product success in the shortest possible time.

We use our unique design process, proper planning and structure to ensure a delightful experience and reduce the risk of product failure.

If you are looking for family values in your business relationships, Bayly is the place to find them.

BEVINGTON CONSULTING PTY. LTD.

Profile Summary:
For over 25 years the Bevington Group has been providing specialist productivity improvement services in a wide range of government services and commercial sectors, including: aviation; consumer affairs; defence; education; health; human services; local government; transport and border security; trade and treasury and finance.

Our services include:
- Lean and Agile Practice supports rapid non value add (Noise or Waste) removal from processes
- Process Re-engineering Practice provides quantified process and roles data that supports FTE reduction or role redesign
- Operating Model Practice enables the organisation to reconfigure itself to deliver on its products or services. Often a top down (strategic – future view) and bottom up (current view) analysis is required
- Change Management Practice supports the delivery of change that ensures the role, process and system are considered holistically

Bevington Group has significant advantage in delivering productivity improvement services compared to larger, generalist consultancies because of our:
- Specialisation – Our personnel are specialists in our core disciplines. They are supported by leading edge methods, powered by advanced cloud based software
- Methods – We deploy a series of methods which means that you have data to make important decisions about your business. These methods have been tested and proven in hundreds of assignments
- Knowledge transfer – We provide a genuine knowledge transfer service, growing the capability of your team, so they can lead the definition and delivery of change

BIG Change Opex Pty Ltd

Profile Summary:
BIG Change Agency are specialists in helping businesses to increase profits by transforming company culture and engagement levels while at the same time improving business capability through training and consulting in business process improvement tools including but not limited to Business Process Mapping, Lean and Six Sigma and Strategic Assessment and Analysis.
Profile Summary:
Bravo Charlie exists to transform Australian industrial, advanced manufacturing and agricultural companies into world class story tellers; who focus on global markets and connecting with Asia.

On an individual level, we support business, community and political leaders to realise their dreams.

We help organisations commercialise and scale-up their innovations into high-growth sustainable businesses/business units that have delivered significant financial and social returns for all stakeholders.

We work collaboratively with our clients to deliver innovation results, impacts and outcomes:
• Building innovation capacity and culture.
• Achieving commercialising budgets and timeframes; and
• Delivering financial and social returns on investment;

Our experience along the entire innovation process journey enables us to provide deeper insights, make better-informed decisions, and provide more robust recommendations to deliver business and social outcomes and sustainable growth.

Profile Summary:
C4 Engineering is an engineering consultancy that provides technical and project delivery services. Our ISO-15128 Systems Engineering team offers requirement development, management, modelling and test services using DOORS, CORE and ReqPro.

We also offer RF antenna performance modelling alongside design of ICT networked systems that incorporate CISP accredited cyber security architecture, vulnerability analysis, design and test including cyber risk management and auditing.

We have a proven track record in building the capacity of organisations, we work with and in translating innovations into commercial outcomes in the local and global markets. We conduct annual research to investigate how leading organisations are innovating strategically and are delivering more value from their innovation and market development initiatives.

We work collaboratively with our clients to deliver innovation results, impacts and outcomes:
• Identifying, developing, testing, validating and scaling innovations;
• Delivering financial and social returns on investment;
• A focus on customer experience and the value proposition;
• Achieving commercialising budgets and timeframes; and
• Building innovation capacity and culture.

We help organisations commercialise and scale-up their innovations into high-growth sustainable businesses/business units that have delivered significant financial and social returns for all stakeholders.

Profile Summary:
Cobalt Design Pty Ltd is an industrial design and mechanical engineering consulting group offering a full service range for new product development.

We create tangible new IP for our globally focused clients through user-centred insights; creative solutions; and deep manufacturing knowledge.

Our clients range from multinationals to start-ups, within a range of industries:
• Analytical, medical devices
• Commercial, industrial products
• Transport design
• Consumer products, including sporting and soft goods

Our inhouse product development capability includes
• Industrial Design
• Insight-driven analysis & research
• User-interface (GUI) design
• Product Design and Mechanical Engineering
• DIM Design for manufacture
• CAD/CAD modelling
• Simulations; FEA, fluid, moldflow etc
• Prototyping, 3D-Printing
• Mechanical testing (load, ingress etc)
• Production sourcing & tooling management

We bookend the above:
• At the front end, when the opportunity is being defined – Design strategy, Design thinking, Ethnographic research etc;
• At the tail end, when the product is being prepared for launch – Marketing support services, CG animations, Packaging etc

Profile Summary:
Confluent Technology is an Advanced Manufacturing operation focused on the design, development and serial production of parts utilising direct metal Additive Manufacturing (AM) technology.

Manufacturing is changing rapidly. Leading organisations are embracing the unique capabilities of AM to improve product performance and innovation speed, and gain competitive advantage in a global market. However, integrating AM into existing processes poses considerable challenges for those without existing expertise.

Confluent Technology works with organisations through pain-point identification, solution ideation, concept development and selection, engineering design and simulation, prototype production and validation testing, so they can realise the power of AM.

We are an applications focused company with experience in the customer journey on the adoption and development for AM.
Deakin University HQ - Office of the Vice Chancellor

Profile Summary:
Deakin University has a long and proud history of Industry Collaboration, delivering innovative real world solutions for real world challenges. Ranked within the top 300 Universities globally, Deakin has world class facilities and researchers and a reputation for excellence in applied Research in partnership with Industry. Each Industry partner has a dedicated commercial manager from Deakin Research Commercial who will work with them to fully scope the project to ensure the desired outcomes are achieved. Deakin is home to the Institute for Frontier Materials which has over 300 researchers working on developing new materials. Deakin is also home of the Institute for Intelligent Systems Research which specialises in advanced robotics, haptics, VR & AR solutions as well as optimisation and scheduling. These institutes when combined with CADET, the SSMF Centre for Advanced Design and Engineering Training, enable Deakin to provide solutions across multiple sectors.

Deloitte Australia

Profile Summary:
Deloitte’s Manufacturing Team appreciates the nature of the changes that the local sector is undergoing, particularly in regard to the middle market. The advent of the advanced manufacturing toolkit, and assisting companies in understanding which of these innovations should be prioritised for their business, and how they are integrated into individual production processes are key. The Team has worked with a number of manufacturers on diversification strategies, and can support businesses in seeking to establish new markets and products. We work with around 600 Australian businesses in regard to their R&D and innovation programs.

Design + Industry

Profile Summary:
Design + Industry is Australia’s largest and leading industrial design and product development consultancy, with over 50 specialist designers and engineers working out of offices in Melbourne and Sydney.

DINERO GROUP PTY LTD.

Profile Summary:
We’re not a brand consultancy, a packaging design studio or even a communications agency. We’re a creative business that doesn’t limit itself by what we can do, but rather what we can achieve.

Since opening our doors in 1995, we’ve partnered with some of Australia’s most recognisable brands to understand their vision (or challenge) and develop commercially focused, creative solutions across a number of disciplines.

DINERO GROUP PTY LTD.

Profile Summary:
Every 129 Queensbridge Street
Profile Summary:
Crowe Horwath - part of Findex - is a diversified professional and financial advisory with about 120 offices across Australia and New Zealand and employing about 3000 staff. We are the fifth largest firm in Australia and have the largest regional footprint of any similar provider.

We will draw on expertise from across our network to match the outcome required with the project at hand: ours in not a turn-key solution but is rather a solution tailored to your need.

JMB have extensive experience specifically in the automotive and advanced engineering sector with directors having over 100 years combined experience in the sector.

KPMG (Australia)
Profile Summary:
The KPMG team is passionate about manufacturing with experience working with and within some of Australia’s most successful manufacturers (both large and small). We bring industry leading knowhow to improve the capability and profitability of advanced manufacturers. With strong local, national and global networks we are also able to connect our clients to global opportunities and bring the latest insights, from around the world, to our clients.

KPMG is a significant supporter of founders, sole-proprietors and entrepreneurial small-to-medium enterprises (SMEs). We apply proven and tested methodologies to assist businesses to achieve business growth, improvement and profitability and to scale their business through planning and identifying new domestic and international growth opportunities. KPMG’s advanced manufacturing team works with our clients to develop enhanced business processes, improved business models and accelerated growth (in Australia and overseas).

KPMG also possesses considerable technical expertise in the form of highly qualified and experienced scientists and engineers across a broad range of disciplines that can be used to resolve technical challenges and assist with the development of innovative solutions in order to grow our client’s businesses.

In short, KPMG seeks to assist advanced manufacturers to prepare their business for growth through:
- A well-defined value proposition for domestic and international business development;
- A clear plan for business growth (including operational efficiency, business process improvement etc.);
- A clear understanding of global market opportunities;
- A plan to win business overseas and support (leveraging KPMG’s global network) to execute that plan; and
- Access to engineering and technical experts from a range of sectors to provide a different perspective on related business challenges.

La Trobe University
Profile Summary:
At La Trobe University, we believe there are exciting times ahead for Australian Manufacturing. Industry must create impact and attain market influence by embracing innovation. The synergy between invention, science, engineering, and technology will be used to take R&D and turn its outcomes into competitive and desirable products or services. We will deliver:

- Development of technologically intensive products or systems that help industry compete globally in markets such as Agriculture, Infrastructure, Medical, Defence, Space and Aerospace;
- Development of innovations to facilitate access to these markets;
- Gap analysis, assisting companies who have a product, idea, capability or development they want to bring to the marketplace;
- Assistance with risk management, especially as it relates to compliance for ISO9001, AS9100, ISO 13485 and ISO14001;
- Facilitating business-to-business R&D in the advanced manufacturing space domestically and internationally. We aim to match synergistic companies with La Trobe staff to build high-performing teams.

Laneway Consulting
Profile Summary:
We provide Asian Market business development services to Japan and South Korea; providing strategic planning, implementation and hands-on new market development. We also service other Asian markets (Indonesia, Greater China).

With Japanese fluency, we have an extensive in-market network, with 22 years market experience gained at Austrade, Babcock & Brown, KPMG, PwC, and recently as Partner at Grant Thornton. Our clients today include Australia’s largest Vitamin brand, an Australian SR&BD fund, plus other Melbourne brands. With experience as Trade Commissioner, Tokyo (2007-2012), we can provide thorough planning and guidance to support your new business. As head of the Philip Morris Japan Marketing Research Department we have solid experience in brand and marketing strategic development into Japan and (South Korea).

We can support your EXPORT PLANNING (one-off consulting, training and workshops) supporting Victorian companies (all sectors plus ADVANCED MANUFACTURING) create robust export plans where we can also support their hands-on implementation.

Lean Design Australia Pty Ltd
Profile Summary:
We Design, Build and Ignite Greatness.

As a Strategic Partner we help clients transform into high-performance, high-growth, high-profit, outcome-focused, customer-centric businesses, with capability to be top 10 in their chosen market.

We have the right tools and know-how to turn this potential into rapid momentum. We will help take your business out of the ordinary and into the realm of high-performance – while not an easy journey, allow us to help you become the business you want and need to be.

Our extensive experience in Toyota’s unique Innovation and Business Transformation principals and methodology can lead you in a structured step by step process along this path.

Melbourne Centre for Nanofabrication

**Profile Summary:**

The MCN is the largest and broadest capability within the Australian National Fabrication Facility (ANFF)—a national network of micro/nano research infrastructure. The MCN is an open-access, multi-institutional laboratory employing LEAN operating principles akin to those of a high-throughput industry environment to ensure a consistent and high-quality client experience (certified under ISO 9001:2015).

Staff at MCN can train new users to become proficient in tool operation of the tools and systems, using the facility as an extension in-house R&D. Staff can also conduct fabrication or analysis services by quotation, or collaborate fully design, prototyping and batch production.

The MCN enables productivity and quality gains for users by providing a pipeline for design, fabrication, characterisation and testing of materials and devices within one facility. This enables an easy transition from concept to prototype, with the possibility to scale up to trial batch production, creating a comprehensive user experience.

**Service Activity:**

Melawson Business Advisory

**Profile Summary:**

True value-creation growth demands a balance of investment, industry expertise, strong leadership, strategic planning and execution and a structured framework of support. At Mawson we work with you to actively develop, implement and manage financial, management, and decision-making infrastructure to realise your full growth potential through exploiting latent synergies within your existing supply chain and/or taking advantage of new market opportunities.

**WHAT WE DO**

- Business strategy, planning and execution.
- Organisational structure review and performance management.
- Business Turnarounds and Transformations.
- Recruitment, retention and training for growth.
- Leadership-team creation.
- Development of finance function providing visibility of key operational drivers and linkages to economic objectives.
- Development of policies and procedures for day to day decision making.
- Capital raising.
- M&A.
- Implementation of governance and accountability frameworks.
- Provide access to critical industry networks and expert advice from an experienced team who have successfully owned and managed their own businesses.

**mdp McDonald Partners**

**Profile Summary:**

mdp is a contemporary commercial advisory, intellectual property (IP) and patent law firm. Our services include protecting, commercialising and enforcing IP for our clients. With our established network of international associates, we can assist you with brand protection and commercial advice domestically and globally.

We recognise the link between the IP advice we provide and the impact it could have on the overall commercial success of your business. As shareholders and board members ourselves, we ensure we understand and support your commercialisation needs as well as your growth objectives.

Our Managing Director Michael McDonald is the Chairman of six SMEs, including environmental engineering company Leighmont O’Brien and award-winning mobile learning platform Quitch. Our IP Director, Sarah Gilkes, sits on the board of Quitch and has held board positions in several not-for-profit organisations.

Highly regarded as trusted advisors by clients, we are valued for our judgement, commercial acumen and straight-talking advice.

Matthews Steer Pty Ltd

**Profile Summary:**

Matthews Steer are community-focused accountants and business advisors operating throughout Melbourne, with a particular focus on the North West.

We provide tailored services for SMEs, aimed at assisting clients to build a foundation, unlock growth potential, support decision making and convert efforts into wealth.

Successful outcomes our clients have achieved following our Business Growth Support program include:

- Redefining leadership team roles.
- Introducing automated production lines.
- Refined online sales and marketing strategies.
- Adoption of lean manufacturing processes.

We are committed to recruiting and developing new university graduates to be broadly skilled advisors. Our core team is supported by a network of industry specific advisors.

Our proprietary business analysis programs produce maximum outcomes for clients:

- Strategic Focus Workshops
- Catalyst Program
- Virtual CFO
- 3 Way Financial Forecasts
- MS Hothouse

**STRATEGIC ALLIANCES**

If appointed, we will draw on our extensive network to promote the program:

- Melbourne’s North Food Group
- NORTH Link
- Victorian Transport Association
- Family Business Australia
- Industry Capability Network
- Space Tank

Profile Summary:
MEMO's primary focus is to bring sustainable and measurable performance improvements to businesses through the integration of technology, training and process improvements.

MEMO's services span multiple industries with a focus on the business processes covering design and engineering, digital mock-up, product development, virtual process planning and simulation, and digital manufacturing.

Services include:
- Business planning - includes facilitating strategy, business process optimisation, project management and accreditation and certification services
- Design & engineering services - includes project feasibility and risk assessments, 3D design, virtual design and process simulation, problem solving, and process and system optimisation
- Technology services - includes system design, requirements gathering, systems selection, implementation, training and support, bespoke development and hosting services
- Training - includes development of training programs and materials

Minter Ellison
Profile Summary:
Minter Ellison is a leading Australian commercial, risk and legal advisory firm. Our multi-disciplinary team includes lawyers, technology consultants, governance experts, tax consultants, design thinking experts, business transformation experts and registered IP and patent attorneys who bring together a broad range of expertise to deliver solutions to different organisations in all sectors and at different stages of growth.

Monash University
Profile Summary:
Monash University is globally recognised for the breadth and depth of its research. Our strong focus on partnering with industry enables SMEs to work alongside our world-leading researchers and provides access to our unique infrastructure and research platforms. In Additive Manufacturing, Monash works closely with our partners to create bespoke solutions to unique manufacturing challenges. Leveraging our network of research centres at Monash and the Clayton Innovation Precinct, we are able to draw on cutting-edge capabilities and expertise and apply these in innovative ways to provide new opportunities for manufacturers. Metal and polymer printing is a key strength, exploiting recent discoveries in metallurgical and materials science - including applying emerging technology in real world applications.

Monash has established capabilities in aerospace, oil, gas and biomedical industries, including manufacture of new designs and complex geometries, production of new materials with improved properties, increased global competitiveness, and innovations to reduce manufacturing waste.

Outerspace Design Group
Profile Summary:
Outerspace Design product development has been transforming insights into commercial outcomes for over 25 years. Our team of 25 industrial designers and engineers with diverse skills and perspectives add depth to your project.

Equipped with a unique range of resources, we deliver better results faster:
- Full service workshop for hand sculpted and 3D printed prototypes
- Office in California for a direct connection to the technology sector
- Latest 3D CAD and visualisation software
- Dedicated deep dive rooms and video conference facilities
- Trend forecasting hub and materials library

Whether you require a turnkey solution, or a little help, we offer a complete range of services:
- research
- concept development
- 3D CAD modelling
- mechanical engineering
- prototyping
- tooling & production management

Profile Summary:
Planet Innovation is an Australian company that specialises in developing and commercialising products that have a positive impact on the world. We provide technology innovation, product development and commercialisation expertise to companies around the world and we focus on the biomedical, clean-tech and hi-tech industries.

We have over 250 brilliant, passionate and commercially focused employees, including product developers, engineers, scientists, industrial designers, technicians, project managers and QA managers.

We specialize in Biomedical and Hi-Tech connected devices; and excel at exploiting the technology convergence between these sectors. In addition to developing products for our clients we also develop and launch our own products and platforms. We apply the learnings from developing these internal products to benefit all our clients by ensuring if there is a faster, smarter way to help clients launch their products then we will achieve this by leveraging existing technologies.

Profile Summary:
Procept is a specialist in product development and design for IoT Products, Medical Devices and Consumer Wearables. Our goal is to build businesses by providing services in product design and development, all the way from initial concept to volume manufacturing.

We work at the intersection of business and product development. Using a combination of product management and engineering skills we explore where business and technology feasibility meet. Using our engineering experience in connected technology we make opportunities real through research, rapid prototyping, product development and world-class manufacturing support.

We have over 10 years’ experience in the hardware and software that drives connected hardware. By staying up to date on the latest technologies we’re able to bring fresh thinking to revolutionary product ideas. Delivery is our strength. Our experience cuts through the mass of standards, protocols, and available technologies for IoT Products, Medical Devices and Consumer Wearables. This approach will ensure our clients achieve the right business outcome required from their investment in development efforts.

Profile Summary:
Rigby Cooke Lawyers has been successfully providing a range of ‘business improvement’ related services to the sector for over 25 years. In that time we have directly supported numerous Large Multi-National OEM’s as well as Small and Medium sized Enterprises both here in Australia and in overseas assignments.

We are a very cost effective solution for the sector.

We do not profess to be all things to all people, rather, we have a targeted service offering aimed at helping our customers get the right balance between being effective in the marketplace and being efficient with the delivery of their products and services.

Our team are very experienced and we ensure that level of experience and quality is maintained throughout the entire tenure of our improvement projects.

The objective of our team is to assist with the creation of sustainable improvement. We do this by using a very practical and hands on approach focused on engaging the customer’s team and transferring our knowledge and skills in the simplest possible way.

Through the ‘Boost Your Business Program’ we believe that we can add a lot of value to organisations whose capability includes design, manufacture and service support with sales revenue up to approximately $50M P.A.

Profile Summary:
RMIT Advanced Manufacturing Precinct offers unique opportunities for both academic and industrial researchers to develop and commercialise new technologies in a multidisciplinary environment. The Precinct brings together people from across RMIT and beyond to work on projects that address real-world engineering and industrial challenges.

We offer: additive and subtractive process manufacturing in a range of materials; high-speed multi-axis machining centres; and reverse engineering. We focus on particular areas of research and development.

We have a wide range of industry and manufacturing experience including the automotive components sector, plastic parts production, metal components forming and forming.

All clients work with generally need help with one or more of areas of strategy, marketing or performance.

In 2012, we created and ran the RMIT Innovation Program which helps 13 auto component suppliers to think through how to diversify. [Details available on request.]

We have most recently been working as an approved supplier to help 11 clients on the Victorian Government’s ASCTP Program, and we regularly work with manufacturing clients on the Federal Government’s Entrepreneurs’ Program.

We offer our services to eligible customers who are interested to create and win new business opportunities.

We have a team based methodology - operating the company with 1 director and 7 registered associates.
Robert Bosch Australia

Profile Summary:
Our Manufacturing Solutions division is globally recognised for their innovative work in engineering services. As part of our dedication to quality and customer satisfaction, we offer a highly structured approach to project management, overseeing the quality, cost of ownership and risk management, keeping our customers informed every step of the way.

Our flexibility in manufacturing solutions allows us to create:
1. Improvement of yield and throughput on assembly lines
2. Designing, building and integrating assembly lines for electronic products in both low volume and highly automated/high volume applications.
3. Development of various assembly and joining processes
4. Integrating equipment into different servers / Manufacturing Execution Systems

Facilitating Design for Manufacture process reviews and i4.0, resulting in significant manufacturing efficiencies, material, labour and equipment savings along with establishing robust and reliable manufacturing solutions. Bosch globally supports leading brands through all major industries and SME's and sectors, to do things more safely, with greater efficiency and improved quality.

Solutions
1. Automated Test Systems
2. Production Automation Solutions
3. Turnkey Special Purpose Equipment
4. LEAN Manufacturing Services
5. Project Management
6. Mechanical & Electrical Design
7. Process Engineering
8. Control System Engineering
9. Integration to MES
10. Integration into all facets of i4.0
10. Assembly and Testing Facilities

Successful Endeavours Pty Ltd

Profile Summary:
Successful Endeavours designs electronics based products that are intended to be manufactured in Australia. Our primary services are:
- Requirements capture and analysis
- Technology selection
- Electronics Design
- PCB Layout
- Software Development
- Prototyping
- Production preparation

Our aim is to provide affordable but world class product development services that allow you to be locally and internationally competitive in your chosen market.

And we can also manufacture, product for you if you want that too. Some examples of products we have developed are:

- Air quality monitoring
- Smart city sensors
- Bushfire prevention systems
- Electronic Locks
- Ultra-low powered sensors
- Custom IoT
- Industrial controls
- GPS trackers
- Vehicle management systems
- High voltage power distribution equipment

Our aim is to deliver high impact, practical results, no matter the industry the organisation is looking to succeed in.

[Created from an application form on the Grants portal]
Swinburne University of Technology

Profile Summary:
Swinburne University of Technology is one of the world’s leading universities, ranking within the top 3% of universities around the world, as assessed by the Academic Ranking of World Universities, and ranked in the Top 100 universities under 50 years of age by the Times Higher Education World University Rankings.

We combine innovative, leading-edge research in Advanced Manufacturing with outstanding research facilities. This, coupled with dynamic partnerships with industry, government and other research organisations and universities, leads to world-first research outcomes that have direct and local community benefits.

Our in-house world-leading capabilities include: materials processing, Industry 4.0, manufacturing process development, robotics/mechatronics, nanotechnology, bio-devices, surface science, physical chemistry, biotechnology, solar materials, photonics, data science and business analytics, internet of things, business modelling, industrial design, and technology innovation.

Talk to us today about how we can help your Company get the business it deserves.

taktik(z), Inc.

Profile Summary:
taktik(z) is an independent consultancy company dedicated to helping enterprise customers align technology applications, optimise business processes and achieve superior value, whether the business goal is to enhance business productivity, improve customer understanding, increase loyalty and retention, build incremental or new revenue streams, or realise measurable competitive advantage.

taktik(z) recognizes the importance of providing a complete suite of services, including business and technology strategy, systems design and architecture, applications implementation, network infrastructure, and managed services, empowering businesses to achieve an unprecedented level of interaction, integration, and value in their enterprises.

Tekt Industries Pty Ltd

Profile Summary:
Tekt Industries is a technology design and product engineering company that helps to take the pain out of product development by providing end-to-end development services guided by a quality assured design process.

We specialise in developing the industrial design and electronics engineering within each product but also offer a full range of additional commercialisation services so that each product can be mass manufactured.

Our In-house world-leading capabilities include: materials processing, Industry 4.0, manufacturing process development, robotics/mechatronics, nanotechnology, bio-devices, surface science, physical chemistry, biotechnology, solar materials, photonics, data science and business analytics, internet of things, business modelling, industrial design, and technology innovation.

The Trustee for NEM Business Development Unit Trust

Profile Summary:
Nem has 45 Partners, spanning Australia, NZ & Singapore. Nem has been working with Victorian Medium businesses and supporting the Government initiatives & programs for many years with our 25 Victorian based partners all of who have either successfully owned or managed businesses. Nem is a member of the Business Specialist Advisory Panel for the Latrobe Valley Supply Chain Transition Program (LVCTP) Our experience and deep industry knowledge spans Advanced Manufacturing, Food and Agriculture, Export Asia specific and we help a number of Social Enterprises.

Nem has significant SME based IP such as the Strategic Business Review process, A Business Potential Analysis shows the owner the financial impact of making improvements, detailed Improvement Plan is developed in conjunction with their team and provides a step by step approach, supported by specific actions and timelines, to improve business performance. Nem’s CAMAtm process identifies a businesses competitive advantage (CA) (they all have at least one) as well as markets that may be attractive (MA). The CAMAtm results are then put on one page for easy viewing. Nem can provide all the supporting services eg. capital raising, financial management/analysis, marketing, governance, human resources, interim management, Mergers & Acquisition knowledge etc, to assist the business successfully implement its Development Plan. nem is non conventional as we help the business put the actions in place - we do not just produce a plan and walk away.

Threshold Ventures

Profile Summary:
Threshold Ventures works with innovative startups and more established companies from around the world which are looking to enter the US market and/or access capital.

Founded by a serial entrepreneur and former venture capital investor, Threshold Ventures has an extensive network of contacts in the US, particularly in Silicon Valley. We have successfully worked with numerous Australian companies and leading organisations including CSIRO. Our team has a variety of expertise, industry and sector experience and contacts which we leverage to help companies get market feedback as well as connect to potential customers.

We help companies develop the right story, identify the most appropriate target markets/customers, and help navigate business introductions.

Treadstone Enterprises Pty Ltd

Profile Summary:
Treadstone offers a pragmatic approach to help manufacturers grow. We specialise in delivering capability improvement and business strategy consulting in line with the Boost Your Business voucher guidelines.

Established in 2008, Treadstone’s consultants are industry practitioners who have deep backgrounds working with founders, CEOs and senior management at various stages of growth. We delivered workshops and implemented the Victorian Government’s Innovation Voucher Program as an approved supplier from 2012 to 2014 and are pleased to be approved for the new Boost Your Business Voucher program in 2018.

Our clients are from a range of industry sectors including, food and beverage, transport, agricultural machinery, defence technologies, engineering, sport tech, furniture, glass manufacturing and construction.

- Business Process and Systems Improvements

Our team has wide experience in evaluating business processes and systems and developing business cases for new technologies. We have experience in research, design and install of large scale processes. We can also review existing systems to maximise your operational performance and benchmark against best practice.

- Market Development Plan

Our approach is the pragmatic consideration of the current business assets, processes and value proposition in respect to the goals of the business owner and the market opportunities. We start with a comprehensive business review to capture the knowledge and sentiment of the business management team. We design tailored workshops to test and address the priority issues, and build your business roadmap with a clearly defined action plan.
